Office Action Summary

Art Unit: 1714

1. The amendment received December 19, 2002 has been made of record.
Claims 1-67 are pending.
2. The Office action mailed July 19, 2002 was in error and is being withdrawn.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 13-17 and 29-50, drawn to polymeric composition and processes, classified in class 524, subclass 448.
 - II. Claims 12, 18-28 and 51-67, drawn to a molding apparatus, classified in class 425, subclass 542.
4. The inventions are distinct, each from the other because:
5. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in a process which does not require the composition of group I.
6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
